## Installing HandBrake on Windows 10

By Engineering IT

September 1, 2020

- 1. Open the HandBrake download site in your browser
- 2. Click Download (64 bit Portable Zip)

3. If prompted, select Save File and click OK

- 4. Open Windows Explorer (press **4** + E) and then open **Downloads** from the left side
- 5. Click on the zip file you just downloaded
- 6. In the ribbon menu along the top of the window, click **Compressed Folder Tools**
- 7. Click Extract all
- 8. In the dialog, confirm the folder is correct and click Extract

9. Once the extraction is complete, it will open the destination folder. **Right-click** on the **HandBrake** item and select **Send to** → **Desktop (create shortcut)** 

## Compressing a Video using HandBrake

10. Launch HandBrake from the shortcut on your desktop you created:

11. In the Source Selection window, click File – Open a single video file

12. Browse to the video you'd like to compress, select it, and click Open

13. Click Browse and select where you'd like to save the compressed video
